Governor's Bill No. 16

OMG? It will take the Attorney General's Office or a Court to interpret these proposals. Show me how each change statistically corrects a real challenge; not a possible prophesy. Most of the current regulations or the proposed is there a ongoing concern or a reaction to

I do not see any ADDRESSING GUN VIOLENCE AND JUVENILE CRIME in the changes? Provide a public report on how current regulations have reduced gun violence and how many guns were registered that were used? Only the law abiding citizens are registering. Connecticut laws don't cover the world; thus dishonest criminals will find a market.

An example is a 22LR rimfire rifle with a thumbhole stock I have. How many weapons like this have been use in violent shootings? How does a pistol grip, suppressor, folding telescoping stock, etc. on any rifle reconcile to reality of gun violence and juvenile crime?

(ii) A semiautomatic, rimfire rifle that has an ability to accept a detachable magazine and has at least one of the following: (I) A folding or telescoping stock; (II) Any grip of the weapon, including a pistol grip, a thumbhole stock, or any other stock, the use of which would allow an individual to grip the weapon, resulting in any finger on

the trigger hand in addition to the trigger finger being directly below any portion of the action of the weapon when firing;

We had automatic and semiautomatic rifles available like M1, M14, Thompson MG, etc. to the public for many years and never had these mass shootings. The problem is between the ears; not the weapons. Spoons don't make you fat.
